

Primer parcial práctico

Wuke Zhang

1-ASIR

The image shows the Netflix logo, which consists of the word "NETFLIX" in a bold, red, sans-serif font. The letters are slightly shadowed, giving them a 3D appearance as if they are floating or attached to a surface. The background is a solid black rectangle.

Introducción: Nos piden crear una base de datos similar a la de netflix, que tiene que tener sus respectivas representación de las entidades y relaciones, cardinalidades y atributos.

```

CREATE DATABASE icseflix;

CREATE TABLE User(
    Id_user INT PRIMARY KEY AUTO_INCREMENT,
    Name VARCHAR(15) NOT NULL,
    Surname VARCHAR(15) NOT NULL,
    Email VARCHAR(15) UNIQUE,
    PhoneNumber VARCHAR(15) NOT NULL,
    CreditCard VARCHAR(30) UNIQUE
);
  
```

```

CREATE TABLE Genre(
    Id_genre INT PRIMARY KEY AUTO_INCREMENT,
    Genres ENUM
('Action','Adventure','Comedy','Drama','Fantasy','Horror') NOT NULL,
    User_id INT,
    CONSTRAINT FK_Genre_User FOREIGN KEY (User_id)
REFERENCES User(Id_user)
);

CREATE TABLE Titles(
    Id_title INT PRIMARY KEY AUTO_INCREMENT,
    TitleName VARCHAR(25) NOT NULL,
    Released_year DATE NOT NULL,
    Synopsis TEXT,
    Age_range ENUM ('All','13_years','16_years','18_years') NOT NULL,
    Genre_id INT,
    CONSTRAINT FK_Titles_Genre FOREIGN KEY (Genre_id)
REFERENCES Genre(Id_genre)
);

CREATE TABLE Seasons(
    Id_season INT PRIMARY KEY AUTO_INCREMENT,
    Season_number INT NOT NULL,
    Title_id INT,
    CONSTRAINT FK_Season_Title FOREIGN KEY (Title_id)
REFERENCES Titles(Id_title)
);

CREATE TABLE Episodes(
    Id_episode INT PRIMARY KEY AUTO_INCREMENT,
    Episode_number INT NOT NULL,
    Episode_name VARCHAR(40),
    Season_id INT,
    CONSTRAINT FK_Episodes_Seasons FOREIGN KEY (Season_id)
REFERENCES Seasons(Id_season)
);

CREATE TABLE Follows(
    Id_followed INT,
    Id_followers INT,
    PRIMARY KEY (Id_followers, Id_followed),

```

```

        FOREIGN KEY (Id_followers) REFERENCES User(Id_user),
        FOREIGN KEY (Id_followed) REFERENCES User(Id_user)
    );

CREATE TABLE Rates(
    Id_rate INT PRIMARY KEY AUTO_INCREMENT,
    Stars ENUM('1', '2', '3', '4', '5'),
    Comments TEXT,
    user_Id INT,
    title_Id INT,
    CONSTRAINT FK_Rates_User FOREIGN KEY (user_Id)
    REFERENCES User(Id_user),
    CONSTRAINT FK_Rates_Titles FOREIGN KEY (title_Id)
    REFERENCES Titles(Id_title)
);

```

Conclusión:

Es una actividad que nos obliga a hacer las tablas necesarias y que hagamos bien las foreign keys, para mi la tabla más difícil de representar fue la de rates ya que tenia que llevar la foreign key de los titles para saber cual y la de usuarios para saber quien lo rateo y a tabla de seguidores ya que hay 2 primary key.
